Bedrock Learning

An overview of the data we collect

In order to facilitate your school's account and provide quality reporting on your learners' progress, we collect a limited amount of data from your school's MIS. Below is a summary of these data points and the reasons for their collection.

MANDATORY DATA: LEARNERS	
MIS ID	Used as a unique identifier with Single Sign On (SSO) for ADFS and Moodle. Prevents duplicate records being created.
Surname	Combined with additional information, creates a unique identifier for self-activation of accounts. Used when a student needs to recover a lost/forgotten password. Also used in reporting for staff members and to set assignments and monitor usage.
Forename	Combined with additional information, creates a unique identifier for self-activation of accounts. Used when a student needs to recover a lost/forgotten password. Also used in reporting for staff members and to set assignments and monitor usage.
Admission number	Used as a unique identifier to support the movement of data and prevent duplicates (for example if a school chooses to move MIS system).

MANDATORY DATA: STAFF	
Title	Used to set naming conventions.
Surname (preferred)	Used to identify staff members for reporting.
Forename (preferred)	Used to identify staff members for reporting.
Main work email	Used to identify a staff member on activation of their account. Used in reporting as an identifier and can be used to reset lost/forgotten passwords. Can be used as an opt-in only notification system.

Primary email address	Used when work email data field is unpopulated. See above.

MANDATORY DATA: GROUPS	
Class name	Identifies the name of a class stored in the school's MIS so that staff members can report on groupings of students. Used to set assignments for particular groups.
Year Group	Identifies year group types to help identification for the user.
Ability	Used to ascertain which part of the curriculum students should begin in.

MANDATORY DATA: ADDITIONAL STUDENT INFORMATION	
Pupil premium indicator	Used to help schools view and measure the impact of Bedrock, segmented by key demographics.
Gifted	Used to help schools view and measure the impact of Bedrock, segmented by key demographics.
EAL	Used to help schools view and measure the impact of Bedrock, segmented by key demographics.
Gender	Used by staff members to analyse usage.
SEN	Used to help schools view and measure the impact of Bedrock, segmented by key demographics.
Miscellaneous	Any custom metric the school wishes to track for measuring impact.
Reading age	Used to ascertain which part of the curriculum students should begin in.
School email address	Used as a unique identifier for resetting passwords, sending quiz scores and providing technical support.
Unique pupil number	Used as a unique identifier for Moodle, Frog and Realsmart VLE integration. Also used if a school creates custom groups via CSV upload.
